FAN CLUB Model Double trampoline

Roman Budde, a junior fischertechnik developer, was in our factory during the summer holidays as part of a holiday job. During this time here, he actively supported the development department. He spent most of his working day building models for trade fairs and exhibitions. He also designed FAN CLUB model of the current issue for you. He built a trampoline model of a special sort. By combining the two construction kits PROFI Dynamic XM and PLUS Dynamic Trampoline, he had the opportunity to create a model with two trampoline coverings. Consequently, the balls can fly in different directions. A model that makes action en vogue. We wish you a lot of fun with the replica of our FAN CLUB model!
